

The mission of the California Fire Mechanics Academy is to develop and provide an effective training program that addresses the needs of emergency vehicle technicians. The need for quality education and training is the same as it is for emergency response and rescue personnel. The CFMA has been in existence since 1970 and has provided training on a yearly basis for almost 45 years. The CFMA has become a nationally recognized and respected training resource for emergency personnel from all over the United States.

It is extremely important that the Academy continues to have the support of the fire apparatus and equipment manufacturers. Classes are continually updated to reflect the latest equipment and technology innovations. We need your support in order to continue providing a quality, up-to-date curriculum to the many students we serve.

There are several levels of sponsorship so choose the one that is right for you!
