- **Medical, Dental and Vision**
- **LTD**
- **401(k) with discretionary match**
- **Paid Holidays and Vacation**

Position Overview:

The Fire Technician I is responsible for repairing and overhauling fire vehicles and fire apparatuses. Must be certified in the use of the following diagnostic software programs: V-Mux, Detroit, CAT, Cummins, Wabco, Service link, Allison and Mercedes. Must have experience working on fire apparatus to include fire pumps, electrical systems, multi-plex electrical systems, brakes, suspension and drive trains including experience troubleshooting, maintaining, repairing and rebuilding CAT, Detroit, and Cummins engines. Experience performing annual fire pump tests, welding experience and extensive small tool and small equipment repair experience is a must. California State Vehicle Inspection License, Certified Diesel Mechanic and a California CDL Class "B" with Hazmat Certification are required. Work involves ability to follow directions and work with limited supervision.

Principal Duties and Responsibilities (Essential Functions):

Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

- Inspect and diagnose mechanical defects in mechanical equipment, including diesel engines, gasoline engines, transmissions, fire pumps, hydraulic ladder equipment and other equipment typical to vehicles and fire apparatuses.
- Performs repair and maintenance work on vehicles and heavy equipment including brake work, chassis work, transmissions, electrical work, fuel systems, cooling systems emission control systems, and welding.
- Performs preventative maintenance on Fire vehicles including inspections, changing oil, greasing, and tune-ups.
- Operates units after repairs are complete to ensure good working order and that problems were corrected.

Fire Technician

- Maintains shop repair records, vehicle files, tool inventory lists, and material safety data forms.
- Consults with vehicle or equipment operators to assist in diagnosing problems and facilitating the repair procedure.
- Assists in safety inspection program for all vehicles. Operates a variety of diagnostic instruments and a variety of hand, electric, and air-driven tools.

Qualifications & Skills:

- Strong technical/mechanical skills and experience required; product knowledge helpful.
- Must be organized.
- Must be able to read, write and understand service instructions.
- Computer skills are important.

Education & Experience:

- Technical/mechanical training preferred.
- 3 to 5 years fire vehicle repair experience.
- EVT, CA state, or fire repair factory certificates preferred.
- Thorough knowledge of automotive mechanics; Considerable knowledge of gas and diesel engines, transmissions, hydraulics, fire pumps and valves, generators, and welding; price trends and grades or quality of materials and equipment; Working knowledge of the hazards and safety precautions common to municipal maintenance and repair activities; Working knowledge of the practices, methods, materials and tools used in modern equipment maintenance.

Physical Requirements:

The physical demands described here are representative of those that must be met by an employee to successfully perform the essential functions of this job.

While performing the duties of this job, the employee is regularly required to talk and hear. This position is very active and requires standing, walking, bending, kneeling, stooping, crouching, crawling, and climbing all day. The employee must frequently lift and/or move items over 70 pounds. Specific vision abilities required by this job include close vision, distance vision, peripheral vision, depth perception and ability to adjust focus.
